Django React Redux PostgreSQL SQLite

Node.js AJAX Alpine.js Ubuntu Nginx

gunicorn Git/Github Bootstrap TailwindCSS

jQuery Digital Ocean

### Personally utilised:

GraphQL Celery Redis Flask Numpy Pandas

matplotlib Vue.js Docker Three.js GSAP

ChakraUI MaterialUI

## EXPERIENCE

### Software Developer

[yellowhousestudios.co.uk](https://yellowhousestudios.co.uk)

📅 03/2020 - Ongoing 📍 Remote

I am currently working full time as a freelance developer, working with small to mid-sized businesses. Currently, I am working with a senior freelancer on the web app for gripped.io.

- Operating independently has allowed me to become proficient in all steps of the web development process, and has shown I can take my own initiative and manage my time efficiently.
- Working directly with clients proves my ability to create strong relationships and be comfortable with client facing roles.

### Stock Supervisor

**Cass Art**

📅 06/2019 - 03/2020 📍 Kensington/Hampstead

This job focused on managing the flow of stock and maintaining stock levels. My responsibilities included being a keyholder.

- I was entrusted with making sure the 'backend' of the shop was operating as it should.

### Sales Assistant

**Rose Morris**

📅 09/2019 - 11/2019 📍 Charing Cross

As a luxury product salesman I learnt how to create connections with clients, and further developed my strong social skills.

- I was the top salesman in within the first month.

## PROGRAMMING

### HTML & CSS

### Python

### JavaScript

### SQL

## STRENGTHS

Committed to life-long learning

Fast and efficient learner

Driven and passionate

**Guilbsborough School Academy**

📍 Northamptonshire

- Maths: A
- Business Studies: B
- Media Studies: C
- History (AS): A\*

## LANGUAGES

**English**

Native

**French**

Intermediate

## PROGRAMMING PROJECTS

### samthompson.io

📅 04/2021 📍 London

🔗 [samthompson.io](https://samthompson.io)

My personal portfolio, showcasing a selection of my personal and professional projects - built using React, GSAP and MaterialUI.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

### BudgetCog

📅 06/2021 - Ongoing 📍 London

A simple budgeting app using React and Django, with Redux, chart.js and Chakra UI

- Using OAuth for authentication with django-allauth and react-google-login

### Yeonmi Park

📅 05/2021 - 05/2021 📍 London

🔗 [yeonmi-park.com](https://yeonmi-park.com)

Creating an interactive 3D experience showing the story of Yeonmi Park.

- Technologies include React, Redux and threejs and GSAP.

### Dronely

📅 02/2021 - Ongoing 📍 London

I am currently building a website using the Django Rest framework and React. This website will allow drone owners to manage their pilot logbook, and any flight information such as risk assessments and site surveys.

- I am working with an associate who is responsible for designing the website (and also flies drones).
- I am hoping to expand the website in the future to enable drone related job postings, and a social side to the app.

## PASSIONS

I compose, write and produce music. I also play guitar (grade 8), bass and piano and have Grade 5 music theory (ABRSM).

I enjoy creating 3D animations using Blender
