

SAM THOMPSON

Software Developer

 yellowhousestudios.co.uk

 London

SKILLS

Professionally utilised:

Django	PostgreSQL	SQLite	AJAX	Alpine.js
Ubuntu	Nginx	gunicorn	Git/Github	Bootstrap
TailwindCSS	jQuery			

Personally utilised:

GraphQL	Celery	Redis	Flask	Numpy	Pandas
matplotlib	Vue.js	React	Redux	Docker	
Three.js	GSAP				

EXPERIENCE

Web Developer

yellowhousestudios.co.uk

 03/2020 - Ongoing  Remote

I am currently working freelance as a web developer, working with small to mid-sized businesses such as Troubador Publishing, building high-functionality, data heavy websites. Clients mainly include small to mid-sized businesses. These websites are built with the following technologies: Django, PostgreSQL, Javascript/AJAX, Bootstrap/TailwindCSS and Git.

- Operating independently has allowed me to become proficient in all steps of the web development process, and has shown I can take my own initiative and manage my time efficiently.
- Working directly with clients once again proves my ability to create strong relationships and be comfortable with client facing roles.

Stock Supervisor

Cass Art

 06/2019 - 03/2020  Kensington/Hampstead

This job focused on managing the flow of stock and maintaining stock levels. My responsibilities included being a keyholder.

- I was entrusted with making sure the 'backend' of the shop was operating as it should.

Sales Assistant

Rose Morris

 09/2019 - 11/2019  Charing Cross

As a luxury product salesman I learnt how to create connections with clients, and further developed my strong social skills.

- I was the top salesman in within the first month.

PROGRAMMING

Python

HTML & CSS

JavaScript

Linux

SQL

STRENGTHS

Committed to life-long learning

Fast and efficient learner

Driven and passionate

Written and oral communication

EDUCATION

English

Native

EXPERIENCE

Bar Associate

Wetherspoons

📅 03/2018 - 03/2019 📍 Harrow

Whilst at university, I was a part-time barman. I was responsible for training new staff and managing the bar. I learnt to deal with difficult and at times dangerous customers.

- I learnt to work in a fast-paced environment under pressure.
- I developed my customer service skills to a high level.

PROGRAMMING PROJECTS

Dronely

📅 02/2021 - Ongoing 📍 London

I am currently building a website using the Django Rest framework and React. This website will allow drone owners to manage their pilot logbook, and any flight information such as risk assessments and site surveys.

- I am working with an associate who is responsible for designing the website (and also flies drones).
- I am hoping to expand the website in the future to enable drone related job postings, and a social side to the app.
